Angel Garcia Martinez

Curriculum Vitae | Creative Technologist · IT Support · Photo and Video Production · Operations

San Jose, CA · angelgm.tech@gmail.com · linkedin.com/in/angelgtech · instagram.com/addiesphotographs

PROFILE

Bilingual (English / Spanish) technologist from San Jose whose work sits where tech, creative production and community meet. Since 2008 I have taught computer literacy, run IT for small offices, built WordPress sites, photographed and filmed events, and coordinated programs for nonprofits serving low-income families. At Sunday Friends Foundation I build the data, inventory, reporting and AI-assisted systems the organization runs on. I also run HIGHCLOUDSTUDIOS, where I script After Effects, Blender and Python pipelines for event recap videos. Google IT Support certified (2024).

SKILLS

- **IT support:** Windows, macOS, Linux basics, hardware and software troubleshooting, PC builds, TCP/IP, DNS, Wi-Fi and switches, user accounts and permissions, NAS storage, backups and disaster recovery, security best practices, Snipe-IT asset tracking, ChromeOS Flex, Trend Micro endpoint security
- **Web and cloud:** WordPress (themes, plugins, migrations, performance, SEO), domain transfers, hosting, Google Workspace, Google Cloud OAuth, Gmail / Drive / Calendar / Sheets / Docs APIs
- **Scripting and AI:** Python (Flask, Pillow, SQLite), Google Apps Script, PowerShell, Bash, browser automation, After Effects ExtendScript, Blender Python (bpy), ffmpeg, Claude Code multi-agent workflows, ChatGPT, NotebookLM, Canva AI
- **Creative:** event, wedding and portrait photography, videography, Lightroom, Photoshop, Premiere Pro, After Effects, Blender, Canva, pixel art, motion graphics, color grading, photobooth operation
- **Operations:** program and event logistics, volunteer management, staff scheduling, donor records, data tracking and impact reporting, basic-needs inventory and distribution, inventory control (barcode, FIFO, 5S), PearSuite, Bloomerang CRM, Mailchimp, Squarespace, VolunteerHub, Insightly CRM, Santa Clara County HMIS, Microsoft Office
- **Languages:** English and Spanish, both native

EXPERIENCE

Operations & Engagement Coordinator · Sunday Friends Foundation · San Jose, CA (hybrid) · Mar 2025 – Present

- **AI-assisted systems:** designed a two-computer AI operations setup in Claude Code. A coordinator agent routes work to specialist agents (attendance, inventory, communications, email triage), with a shared notice board, hand-off notes and a scheduled morning inbox triage; nothing is sent or deployed without a person's yes.
- **Participation points:** built the Google Sheets and Apps Script engine that scores 3,000+ families into tiers and checks staff uploads against PearSuite, plus a Python robot that pulls PearSuite exports on a schedule for automatic import.
- **La Tiendita (basic needs):** built the inventory and distribution system. Pre-order forms build each packing sheet, stock updates as bags go out, deliveries are logged from Amazon order emails and reports, and reorder suggestions appear on the front sheet; 550+ automated tests and a sandbox copy protect every update. 650+ bags reached 170+ families in Jul–Sep 2026.
- **Attendance data:** moved paper sign-in sheets and Zoom rosters into a SQLite database (3,000+ members, 7,500+ attendance records) with OCR, confidence scoring, a review dashboard, an audit log and backups; set up a program taxonomy (program, focus area, activity, session topic) so reports count the same way.
- **Reports:** built a food distribution report for Oct 2025 – Oct 2026 (1,000+ families and 4,000+ people over 40+ distribution days, each number linked to its scanned sign-in sheet) and a quarterly family report (250+ families, children 0–5, online classes, demographics) for funders.
- **IT:** run Google Workspace accounts, Trend Micro endpoint security on 10 devices and a Snipe-IT device inventory (Docker); converted 10 retired MacBook Pros to ChromeOS Flex; completed Santa Clara County HMIS data-security and client-consent training; co-owned the data review for the Bloomerang donor CRM launch (about 15,000 records, May 2026).
- **Email:** reorganized a high-volume inbox into a 150-label system and sorted 3,500+ backlogged messages through the Gmail API.

- **Communications:** build and send the weekly Foto Friday email to 6,000+ subscribers (Mailchimp), plus social posts, campaign emails (Kindness Awards, Holiday Shopping Spree, year-end appeal QR codes), Squarespace page updates and the "Art is Community" video.
- **Programs:** launched a bilingual computer class at Community Days (July 2026); used AI tools with Dream. Build. Mentor. Lab entrepreneurs (cohort 2 graduated more than a dozen family businesses, July 2025), and track attendance and final presentations for cohort 4's 20+ participants.
- **Logistics:** coordinate workshops, classes and Community Days (scheduling, space, partners, materials) and support volunteers from onboarding through recognition.

Founder & Creative Technologist · HIGHCLOUDSTUDIOS · San Jose, CA · 2025 – Present

- Built an automated photo-wall recap pipeline (After Effects ExtendScript, aerender, ffmpeg) and delivered recap videos for live events, including 7 cuts for one event.
- Build and render 3D scenes in Blender with Python scripts (bpy), from models and light rigs to turntable renders.

Web Developer, WordPress Specialist · Bay Era Digital (freelance) · Remote · Jan 2024 – Present

- Build and migrate websites for small businesses so they keep a reliable online presence.
- Manage every part of client WordPress sites: theme customization, plugins and performance.
- Migrated a client from Squarespace to WordPress, including domain transfer and Google Workspace business email.
- Run regular backups and disaster-recovery plans, and give clients ongoing support on site management and SEO.

Co-owner & Lead Photographer · Addie's Photography · California · Jul 2016 – Present

- Manage videography from equipment setup and on-site shoots to post-production in Adobe Creative Cloud.
- Photograph and edit weddings and events; wedding packages include 10 hours of coverage, a second photographer and 200 retouched photos.
- Set up instant photobooth delivery so guests get photos by QR code, text or email right after each shot.
- Support office systems and photobooth equipment on Windows and Mac.
- Manage website hosting, NAS backups and cloud storage for the business.

Community Service Worker · Sacred Heart Community Service · San Jose, CA · Apr – May 2024

- Led volunteer teams that stocked and ran a food pantry for families in need.
- Gave direct help and referrals to housing, healthcare, employment and education services, in English and Spanish.
- Kept the pantry stocked and open on short-staffed days with no volunteers available.

Warehouse Distribution Specialist · San José–Evergreen Community College District · San Jose, CA · Nov 2019 – Mar 2021

- Inspected incoming shipments against purchase orders and reported shortages, damage and discrepancies.
- Organized warehouse storage and scheduled routine and special deliveries to college departments.
- Kept inventory accurate with barcode scanning and annual physical counts.

Production Associate · Tesla · Fremont, CA · Oct 2018 – Mar 2019

- Performed detailed assembly and prototype work with precision tools to strict quality standards.
- Built a live inventory tracker in Google Sheets and managed stock with FIFO.
- Applied 5S to keep the work area efficient, and flagged material discrepancies to supervisors and engineers.

Hospitality Staff Coordinator · Servers On Demand · San Francisco Bay Area · Jan 2009 – Oct 2016

- Scheduled more than 300 culinary staff for events at venues including LinkedIn, Google and Stanford University, using Schedulehead.
- Moved staff time collection onto the company's WordPress site, saving hundreds of hours of accounting work.
- Set up the computers and network for a new office; repaired workstations and mobile devices and set up staff email on phones.
- Recorded bilingual Camtasia tutorials for non-technical staff.
- Drove trucks and coordinated catering deliveries across several venues.

Program Coordinator · One Economy Corporation (Digital Connectors, Eden Housing) · San Jose, CA · Jun 2008 – Jun 2010

- Taught computer basics, hardware and software, to high school students; was invited back to teach after completing the program as a student.
- Ran orientations for new members and matched them to roles that fit their skills.
- Managed schedules so members met program and contract requirements, and led service projects and professional-development workshops.

PROJECTS

- **Personal AI operations system (2026):** designed a Claude Code assistant that routes work to 6 specialist agents (art, video, photography business, email, IT, research) and 3 scheduled background agents, keeps a shared status board and logs every job.
- **Agent guardrails (2026):** 5 Python safety hooks review each agent command and ask before anything touches work data or sends, shares, deletes or takes a financial action; covered by 300+ automated checks.
- **Real-time market-data automation (2026):** a Python service on a live financial API that runs every 15 minutes with hard limits in code, a restricted key that can't withdraw funds, a 12-hour dry run before going live, a balance check on every run and a one-click off switch; 100+ automated tests. A testing lab ran 140+ simulations with real fees, and locked-down AI helpers turn research videos and news into scored reports but can't act.
- **Email alert relay (2026):** alerts and a daily summary go to the owner only; plain-language replies are read by a locked-down AI agent that can only pick a safe action or queue a request for approval. After a retry bug resent one alert dozens of times, I rebuilt sending as at-most-once with hourly and daily caps.
- **Inbox automation (2026):** a Google Cloud project with OAuth and 5 APIs powers a multi-account Gmail tool. It archived 16,000+ emails in approved batches with full undo logs, taking one inbox from 16,000+ to about 300 with nothing deleted.
- **Drive reorganization (2026):** restructured a 40 GB Google Drive into a documented folder system, with an undo list for every move.
- **Media library web app (2026):** a Flask web app for a 1,600+ item inspiration and media library; streams video from disk, auto-tags items, builds thumbnails and saves mood boards. It also holds 900+ saved Instagram and Facebook posts, sorted onto topic shelves by an AI agent in reviewed batches.
- **Glitch toolbox (2026):** an ffmpeg datamosh script for video and a pixel-sorting tool for stills.
- **Alexis for Seaside campaign website (2024):** designed and built a responsive city council campaign site with donation, volunteer and event sign-up paths, working closely with the campaign team.
- **Home lab:** NAS with family user accounts, permissions, storage caps and a hosted game server; custom PC builds.

EDUCATION & TRAINING

- **IT Support Training Program**, JobTrain, Menlo Park, CA, Aug – Oct 2024: classroom and online training with hands-on Linux and Windows labs, user accounts and permissions, network configuration and simulated remote support.
- **Google IT Support Professional Certificate**, Google / Coursera, Aug – Oct 2024
- **General coursework**, De Anza College, Cupertino, CA
