Angel Garcia Martinez

IT Support Specialist | Google IT Support Certified · Help Desk · Google Workspace · Networking

San Jose, CA · angelgm.tech@gmail.com · linkedin.com/in/angelgtech · Bilingual English / Spanish

SUMMARY

Google IT Support certified technician who has been the go-to tech person at every job since 2008. At Sunday Friends Foundation I run IT for a small nonprofit team (Google Workspace, endpoint security, device inventory and refurbishing) and support the data systems its programs depend on. I migrate and back up small-business websites, give patient bilingual support to non-technical users, and automate repetitive work with Python, PowerShell and Google Apps Script.

CERTIFICATIONS

- **Google IT Support Professional Certificate**, Google, Oct 2024 (credential 68B1TJM87YXH): Technical Support Fundamentals, The Bits and Bytes of Computer Networking, Operating Systems and You, System Administration and IT Infrastructure Services, IT Security
- **IT Support Training Program**, JobTrain, Menlo Park, CA, Aug – Oct 2024

TECHNICAL SKILLS

- **Support:** Windows 10/11, macOS, Linux basics, hardware and software troubleshooting, PC builds and repair, mobile email setup (IMAP / POP3), remote support
- **Networking and security:** TCP/IP, DNS, IP configuration, Wi-Fi routers and switches, user accounts and permissions, security best practices
- **Systems and cloud:** Google Workspace administration, Google Cloud OAuth and APIs, Google Apps Script, Snipe-IT asset management (Docker), ChromeOS Flex, Trend Micro Worry-Free endpoint security, NAS storage, backups and disaster recovery, WordPress hosting, domain transfers
- **Tools:** Mailchimp, Bloomerang CRM, PearSuite, VolunteerHub, Insightly CRM, Santa Clara County HMIS, Microsoft Office, PowerShell, Python, SQLite

EXPERIENCE

Operations & Engagement Coordinator · Sunday Friends Foundation · San Jose, CA · Mar 2025 – Present

- Run day-to-day IT for a small nonprofit team: Google Workspace accounts, Trend Micro endpoint security on 10 devices, account-security alerts, and tech support for staff and families in English and Spanish.
- Track the organization's computers, Chromebooks and tablets in Snipe-IT, self-hosted in Docker and mirrored to a Google Sheet; tested retired laptops from storage and converted 10 MacBook Pros to ChromeOS Flex for reuse.
- Reorganized a high-volume work inbox into a 150-label system and sorted 3,500+ backlogged messages through the Gmail API; a scheduled AI triage now labels new mail every morning.
- Built and support the data tools staff rely on, with AI-assisted development (Claude Code): Google Sheets and Apps Script tools, a SQLite attendance database and a Python robot that pulls PearSuite exports. Every change gets a backup first and automated tests before it goes live.
- Completed Santa Clara County HMIS data-security and client-consent training, and handle participant data under its privacy rules.

Web Developer, WordPress Specialist · Bay Era Digital (freelance) · Remote · Jan 2024 – Present

- Migrated a client from Squarespace to WordPress, including the domain transfer, DNS and Google Workspace business email.
- Set up regular backups and disaster-recovery plans to protect client data.
- Manage themes, plugins, performance and SEO, and give owners ongoing tech support.

Co-owner & Lead Photographer · Addie's Photography · California · Jul 2016 – Present

- Support office systems and photobooth equipment on Windows and Mac.
- Run the NAS backups, cloud storage and website hosting for the business.

- Set up instant photo delivery at events by QR code, text and email.

Hospitality Staff Coordinator · Servers On Demand · San Francisco Bay Area · 2009 – 2016

- Volunteered to set up the computers and network for a new office, which earned a move from food service to an office role.
- Diagnosed and repaired workstations and mobile devices; installed and maintained operating systems and apps; set up staff work email on their phones.
- Built a WordPress time-collection tool that saved hundreds of hours of accounting work, and recorded bilingual Camtasia tutorials so staff could use it on their own.

Earlier: Production Associate, Tesla (2018–2019): built a live inventory tracker in Google Sheets · Program Coordinator, One Economy Corporation (2008–2010): taught computer literacy to high school students.

PROJECTS

- **Home lab:** NAS with family user accounts, permissions, storage caps and a hosted game server.
- **Gmail and Google Cloud automation (2026):** set up a Google Cloud project with OAuth and 5 APIs for a multi-account Gmail command-line tool, then archived 16,000+ old emails in approved batches with an undo log (inbox from 16,000+ to about 300).
- **Drive cleanup (2026):** reorganized a 40 GB Google Drive into a documented folder system, with an undo list for every move.
- **AI agent guardrails (2026):** 5 Python safety hooks that check each command an AI agent runs and ask before it touches work data, covered by 300+ automated checks.
- **Monitoring and alerts (2026):** a scheduled service that emails its owner alerts and a daily summary. After a retry bug resent one alert dozens of times, I rebuilt sending as at-most-once, with hourly and daily caps and quiet hours.

EDUCATION & AWARD

- General coursework, De Anza College, Cupertino, CA
- Lisa Y. Sullivan Award, One Economy Corporation, 2006: a $5,000 scholarship for youth who use technology to transform their communities
